

Acesso remoto a outros MK

PS: Para ter acesso a rádios AP em sua rede, você deverá habilitar a função "ATIVAR GERENCIAMENTO PELA PORTA WAN" do seu rádio.

Simples. Basta criar três regras no firewall. Segue abaixo:

Acesse o menu IP, FIREWALL

Siga as configuração abaixo:

- ACTION = DTSNAT
- O ADDRESS = Endereço IP do AP que deseja acessar.
- TO PORT = Porta de acesso do AP

Confirme e dê um nome em COMMENT para sua regra.

ATENÇÃO: Se o AP que você deseja acessar for um outro AP Mikrotik, você deverá escolher a porta padrão TELNET (23). Se for um AP rádio, escolha a porta padrão HTTP (80) ou outra escolhida no rádio.

Você deverá criar uma segunda regra

Nesta regra, você irá definir um endereço IP para seu AP. Verifique com sua operadora quais endereços IP você tem e quais estão sobrando.

Cria a regra como abaixo:

- CHAIN = DTSNAT
- DST. ADDRESS = Endereço IP livre, a qual será atribuído ao seu rádio ou AP MIKROTIK.
- PROTOCOL = 6 (TCP)
- DST. PORT = Porta de acesso ao AP ou rádio. Se você for acessar outro AP pelo WINBOX, selecione a porta 8291 (PORTA PADRÃO DO WINBOX), se você for acessar um rádio, a porta padrão é a 80 ou outra pré-definida do rádio.

Abra a aba "ACTION"

Nesta aba você irá configurar da seguinte forma:

- ACTION = DST-NAT
- TO ADDRESS = Endereço IP do seu rádio ou AP (endereço de IP da rede interna)
- TO PORT = Porta padrão para o WINBOX (AP MIKROTIK) ou porta padrão para rádios, porta 80 (ou outra definida).

Pronto!!! Para ter acesso a AP MIKROTIK, vá no WINBOX, digite o IP válido definido acima, senha e login. Para ter acesso a rádios, abra o internet explorer, digite o endereço IP válido definido acima... Abrirá um box para senha e login... Digite-as e seja feliz!!!

Não esquecer de adicionar os IP's válidos que serão usados para os rádios na ADDRESS LIST. Como??

Acesse o menu IP, ADDRESS LIST
